

Terraria Progress Tracker

World 1 · Corruption | Classic | Living doc, updated through Session 6 (Saturday, May 30, 2026)

Character & World

WORLD EVIL
Corruption

DIFFICULTY
Classic (5 accessory slots)

MAX HEALTH
400 (capped)

MAX MANA
200 (capped)

PERMANENT BUFF
Artisan Loaf (+4 tile reach)

FAVORED KIT
Bee Keeper + Vilethorn

Play style. First playthrough; immersion and collecting and experimenting across all classes, not min-maxing. Naturally hybrid; currently favors the Bee Keeper (melee) and Vilethorn (magic), with the Demon Bow as backup.

Play philosophy. Infrastructure-first by design. Building world-spanning systems (pylons, platforms, hub base) for short, sustainable sessions around a busy life and to ease navigation once Hardmode makes travel dangerous. Loves collecting resources for their own sake, is not rushing to finish, and enjoys a slow exploring pace. Not progression-focused.

Bosses & Events

Bosses

- ☒ **Eye of Cthulhu**
- ☒ **Eater of Worlds** , killed twice (second run for extra Shadow Scales)
- ☒ **Queen Bee** , dropped the Bee Keeper, now a favorite
- ☐ **King Slime** , not yet fought (optional)

Events Cleared

- ☒ **Goblin Army** (rescued the Goblin Tinkerer)
- ☒ **Blood Moon**

Gear

Armor

Shadow Armor (crafted and equipped; +15% movement speed set bonus)

Weapons

- Bee Keeper (Queen Bee sword; releases bees on hit)
- Vilethorn (magic; pierces walls; from Corruption shadow orbs)
- Demon Bow + Unholy Arrows (backup)
- Light's Bane, War Axe of the Night, Flaming Mace (earlier melee)

Tools

Nightmare Pickaxe, Gold Hammer, Diamond Hook

Accessories

Equipped (5 / 5, Classic)

- Lightning Boots (Hermes + Rocket = Spectre, then + Aglet + Anklet of the Wind)
- Tiger Climbing Gear (Climbing Claws + Shoe Spikes)
- Mana Regeneration Band (Band of Starpower + Band of Regeneration)
- Ancient Chisel (mining speed)
- Feral Claws (melee speed / autoswing)

Other

- Vanity: Whoopie Cushion
- Mount: Chillet (hatched from a Large Dragon Egg found before the Eye fight)

NPCs

Residents

Guide, Merchant, Nurse, Dryad, Painter, Zoologist, Angler, Goblin Tinkerer, Arms Dealer, Tavernkeep, Skeleton Merchant, Dye Trader, Witch Doctor (rolled name "Kohna," unlocked by Queen Bee).

Placement

- Witch Doctor and Goblin Tinkerer housed just below spawn in the starting caves, spaced for happiness and easy access
- Angler and Dye Trader moved to the deep jungle-cave houses

World Map

Surface, from spawn

- **East:** Forest, Desert, Forest (tall tree with an underground room), Jungle, Ocean (east edge). Surface seen end to end; more explored than the west, but not fully explored underground.
- **West:** Forest, Corruption (the Evil biome), then Snow/Ice. Not yet explored past the Corruption.

Underground / biome finds

- Two glowing mushroom caves (one has an Extractinator)
- Granite biome (Granite Golems)
- Spider nest (left alone)
- Depth: only just barely down to the Underworld in any direction; deep exploration still minimal

Infrastructure

- Stone platform from spawn east to the world edge, with rope drops to the surface at intervals
- Two houses built in the deep jungle caves (near where Queen Bee was found)
- Pylon network: a spawn pylon and a jungle pylon
- Gem trees growing on underground stone (topaz, amethyst, emerald)
- Fast east/west surface travel via platform + Lightning Boots + Chillet mount

Next-Session Plans

1. Build a western outpost: extend the platform to the west world edge, explore west (past the Corruption toward the Snow biome), move the Arms Dealer and Tavernkeep there, and place another pylon.
2. Then likely begin the Dungeon (Skeletron).

West is the priority next; east is set aside for now. East surface is seen end to end, but neither direction is fully explored underground.

Session Log

Session 1 • Monday, May 25, 2026 (~5 hours)

- First day. Survived the first night, built initial shelter, started exploring underground
- Mixed early armor: iron legs and cuirass, tin helmet; silver shortsword and pickaxe; iron bow with flame arrows
- Found a small demonite vein (not enough to craft anything)
- Crafted a topaz grappling hook (first mobility upgrade); ended at a cave mouth

Session 2 · Tuesday, May 26, 2026

- Pushed deeper; upgraded topaz hook to diamond hook (big vertical range gain)
- Completed full iron armor; upgraded bow from iron to silver
- Planted first gem trees (topaz, amethyst, emerald)
- Found a Band of Regeneration and a second heart crystal (~140 HP)
- Gathered demonite but came up one ingot short; learned the demonite pickaxe needs shadow scales from a boss, not just ore
- Spotted a gold vein, stopped for the night

Session 3 · Wednesday, May 27, 2026 (biggest early session)

- Realized the demonite pickaxe was boss-locked; spent demonite on the Demon Bow, Light's Bane, and War Axe of the Night instead
- First major surface exploration; traveled the full map east: desert, jungle, ocean
- Picked up wall-climbing gear; crafted the Flaming Mace (go-to crowd control); got Hermes Boots, Jester Arrows, a mana band, and defense/movement accessories
- Found two Suspicious Looking Eyes (Eye of Cthulhu summons) without realizing they were usable
- Traveled west; discovered the Corruption (Soul Eaters) and a glowing mushroom biome with an Extractinator
- Crafted a gold pickaxe, demon axe, and a ruby staff (disappointing); ended with a gold helmet, silver cuirass and greaves

Session 4 · Thursday, May 28, 2026 (focused mining)

- Deep cavern run; gathered enough gold for the full gold armor set
- Found ten heart crystals and used them all, jumping from ~180 to 380 HP
- Stumbled into a granite biome; found a spider nest and left it; found a second glowing mushroom cave
- Ended fully prepped: full gold armor, 380 HP, Demon Bow, Light's Bane, Flaming Mace, diamond hook, 5 accessories, two Eye summons ready, arrows stocked

Session 5 · Friday, May 29, 2026

- Upgraded home; learned potion crafting; recruited Angler, Zoologist, Painter, Dryad
- Beat the Eye of Cthulhu (easy); consolidated chest loot back to base
- Beat the Eater of Worlds
- Crafted and equipped the full Shadow Armor set and Nightmare Pickaxe

Session 6 · Saturday, May 30, 2026 (big push)

- Re-killed the Eater of Worlds for extra Shadow Scales
- Beat Queen Bee, got the Bee Keeper; survived the Goblin Army and a Blood Moon
- Recruited Goblin Tinkerer, Arms Dealer, Tavernkeep, Skeleton Merchant, Dye Trader, and the Witch Doctor (Kohna)
- Ate the Artisan Loaf; maxed mana to 200
- Built the spawn-to-east-edge stone platform with rope access points
- Combined accessories into Lightning Boots, Tiger Climbing Gear, and the Mana Regeneration Band
- Built two jungle-cave houses (relocated Angler and Dye Trader); set up spawn and jungle pylons
