

Terraria: East-Side Field Guide

Gear, items, and tasks worth collecting on the Desert & Jungle side before you head west.
Corruption World 1.

How to use this guide

Each entry has a checkbox to tick as you collect it, plus the source or recipe, the key stats, and a short note on how it plays. It's grouped by where it lives, so you can clear one zone at a time. Nothing here is mandatory; it's a collector's checklist aimed at fleshing out all four classes, magic and summoning included, without leaving the east.

Tags read as: damage type · weapon kind · how you get it. Items already in your kit (Feral Claws, the Anklet of the Wind that's now part of your Lightning Boots) are left off.

Jungle

The densest zone on the east. Ivy Chests sit in Jungle Shrines and Living Mahogany Trees; if you'd rather farm relaxed, fished Jungle Crates drop the same loot.

Boomstick

Ranged · gun · found

Source. Ivy Chests in Jungle Shrines and Living Mahogany Trees (~21.7%), or fished from Jungle Crates (~19%)

Stats. Fires a spread of 3–4 bullets per single piece of ammo. High spread, so short effective range.

Strategy. A close-range shredder that drops most pre-Hardmode enemies in a few shots. Later a component of the Onyx Blaster in Hardmode.

The Bee's Knees

Ranged · bow · Queen Bee drop (1 of 3)

Source. 1/3 chance from Queen Bee (she drops one weapon per kill from a pool of three)

Stats. Turns Wooden Arrows into Bee Arrows that burst into 3+ homing bees (~9 dmg each). Bees home and pierce or ricochet.

Strategy. Near-constant chip damage and knockback stun-lock; strong into early Hardmode and against the Wall of Flesh. Completes your bee trio alongside the Bee Keeper and Bee Gun.

Bee Gun

Magic · Queen Bee drop (1 of 3)

Source. 1/3 chance from Queen Bee

Stats. Fires 1–4 homing bees, ~9 base damage each (10–13 with the Hive Pack).

Strategy. Low mana, fully homing, fire-and-dodge. Boosted by the Hive Pack, which the Witch Doctor (Kohna) sells while she lives in the Jungle.

Hornet Staff

Summon · crafted from Queen Bee wax

Source. Craft from 14 Bee Wax at an anvil (wax drops 16–29 per Queen Bee kill)

Stats. Summons a Hornet minion (12 dmg) that fires Poison stingers (Poisoned 4–7s). Hive Pack raises its fire rate ~30%.

Strategy. Your first real minion. Set it loose and keep fighting with another weapon; pairs with Bee armor.

Bee armor

Summon armor · crafted from Queen Bee wax

Source. 30 Bee Wax total (about two Queen Bee kills), crafted at an anvil

Stats. +13 defense, +23% summon damage, +2 minion slots.

Strategy. The only pre-Hardmode summoner armor. Re-summon Queen Bee with an Abeemination (5 Honey Block + 1 Stinger + 5 Hive + 1 Bottled Honey at a Demon Altar, used in the Jungle) or by breaking a hive Larva.

Jungle armor

Magic armor · crafted

Source. Crafted from Jungle Spores and Stingers gathered in the Underground Jungle

Stats. +80 max mana total, ~+12% magic crit, +6% magic damage; set bonus: 16% reduced mana usage.

Strategy. The pre-Hardmode mage set. A natural pairing for your Vilethorn and any gem staff, and a stronger stat package for casting than Gold armor.

Blade of Grass

Melee · sword · crafted

Source. 12 Stingers + 15 Jungle Spores + 3 Vines at an anvil

Stats. Fast broadsword, low-20s base damage, fires a piercing Leaf projectile and inflicts Poisoned.

Strategy. Good jungle melee and a required component of the Night's Edge, the pre-Hardmode sword capstone. Worth crafting even if melee isn't your main.

Snapthorn

Summon · whip · crafted

Source. 15 Stingers + 12 Jungle Spores at an anvil

Stats. 6 tag damage; grants Jungle's Fury (+12% attack speed for 3s, refreshable); 20% chance to inflict Poisoned.

Strategy. Whips tag an enemy so your minions focus it and hit harder. Pair with the Hornet Staff for a genuine summoner trial.

Thorn Chakram

Melee · boomerang · crafted

Source. 9 Stingers + 12 Jungle Spores at an anvil

Stats. ~28-tile range; once it slows it gains infinite piercing and passes through blocks; 50% chance to Poison.

Strategy. Aimed in any direction, including straight down where broadswords can't reach. Good for hitting clustered enemies and through walls.

Flower Boots

Accessory · Ivy Chest

Source. Ivy Chests (~4.6%)

Stats. Sprouts flowers, herbs, and tall grass as you walk across grass.

Strategy. A passive herb farm for potion ingredients. Cozy and quietly useful.

Staff of Regrowth

Tool · Ivy Chest

Source. Ivy Chests

Stats. Improves herb harvesting (mature herbs yield more seeds) and spreads grass and mushrooms.

Strategy. The herbalist's tool; pairs with Flower Boots for a steady potion-ingredient pipeline.

Bezoar

Accessory · Hornet drop

Source. Rare drop from Hornets and Moss Hornets

Stats. Grants immunity to the Poisoned debuff.

Strategy. Cancels the jungle's biggest nuisance and makes the Queen Bee fight far calmer.

Desert

One self-contained gear track that runs entirely through your Extractinator. Mostly a resource grind, which suits you.

Desert Fossil → Sturdy Fossil (the pipeline)

Task · uses your Extractinator

Source. Mine Desert Fossil veins in the Underground Desert (your Nightmare Pickaxe handles them easily), then feed them to your Extractinator (~10% yield a Sturdy Fossil). Also produces Amber and the Amber Mosquito pet.

Strategy. Gather a big stack (500+) for a full armor set. It's a grind, but it is exactly the kind of resource-collecting you enjoy. Everything below comes from this pipeline.

Fossil armor

Ranged armor · crafted from Sturdy Fossil

Source. ~65 Sturdy Fossils at an Iron/Lead Anvil

Stats. 13 defense (Helmet 4 / Plate 5 / Greaves 4); ranged crit per piece, +5% ranged damage on the Plate; set bonus: 20% chance not to consume ammo.

Strategy. A ranged set that doubles as the engine for the bone thrown weapons below. The ammo conservation pairs well with your Demon Bow and Boomstick.

Bone Javelin

Ranged · thrown · crafted from Sturdy Fossil

Source. Crafted from Sturdy Fossils (yields a stack)

Stats. 20 base damage; sticks to the enemy and inflicts Penetrated (3 dmg/s, up to 6 stacked for 18 dmg/s).

Strategy. Heavy single-target damage-over-time. With Fossil armor's no-consume chance, your supply is nearly endless.

Bone Throwing Knife

Ranged · thrown · crafted from Sturdy Fossil

Source. Crafted from Sturdy Fossils

Stats. Fast, cheap, piercing thrown knife.

Strategy. The piercing counterpart to the Javelin; spam it at crowds, especially under Fossil armor.

Amber Staff

Magic · from the desert pipeline

Source. Built from the Amber your Extractinator produces off Desert Fossils

Stats. A mid-tier gem staff that fires an amber bolt.

Strategy. A free magic option that falls out of the same fossil grind; a nice addition to your casting kit.

Ocean & Sky

What you pass on the way to the east edge: the ocean at the rim and the Floating Islands overhead.

Starfury

Melee · sword · Floating Islands

Source. 1/4 chance in Skyware Chests on Floating Islands (also Sky and Azure Crates)

Stats. 25 base melee; each swing can call a falling star (~37 dmg, pierces once). Its stars are the highest pre-Hardmode melee hit.

Strategy. No boss required, just build or fly up. A future component of the endgame Zenith, so keep it. Careful swinging it in the jungle, a star can crack a hidden bee Larva and summon Queen Bee.

Shiny Red Balloon

Accessory · Floating Islands

Source. Skyware Chests

Stats. Increases jump height.

Strategy. Combines at the Tinkerer with a Cloud in a Bottle into the Cloud in a Balloon (extra jump height plus a double jump). A mobility building block.

Flipper

Accessory · Ocean

Source. Water Chests and ocean loot

Stats. Lets you swim freely through liquid instead of bobbing.

Strategy. Big for exploring water and underground lakes; also a building block for later underwater mobility gear.

Angler quests

Task / reward track · you have the Angler

Source. The Angler hands out one fishing quest per in-game day

Rewards. Fishing-only gear (Tackle Box, Angler Earring, High Test Fishing Line, which combine into the Angler Tackle Bag), the Bottomless Water Bucket and Super Absorbent Sponge, the Fish Hook grapple, the golden fishing set, plus vanity and dyes.

Strategy. A long, low-pressure collectible track that fits your pace. It's also the relaxed way to farm Jungle Crates (Boomstick, Flower Boots) and Ocean Crates.

Finch Staff

Summon · Living Tree

Source. 1/3 chance in a Living Wood Chest inside a Living Tree (you have one on your east forest)

Stats. Summons a Baby Finch minion (~7–8 dmg, contact).

Strategy. The gentlest doorway into summoning. Grab it from that tree's chest and pair it with the Leather Whip the Zoologist already sells you.
